## DETAILED ACTION

### *Election/Restrictions*

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- a) a hapten or an antigen
- b) a protein or a peptide or a polysaccharide or an oligosaccharide or a nucleic acid
- c) either SEQ ID NO: 1 or 2 or 3 etc...
- d) a virus or a bacterium

If a is elected, then applicant should elect either a hapten or an antigen.

If b is elected, then applicant should elect either a protein or a peptide or a polysaccharide or an oligosaccharide or a nucleic acid.

If c is elected, then applicant should elect a **single sequence** for examination.

Either SEQ ID NO: 1 or 2 or 3 etc. through SEQ ID NO:136.

If d is elected, then applicant should elect either a virus or a bacterium. In addition, if a virus is elected, applicant should elect either respiratory syncytial virus or parainfluenzae virus or influenza virus or hantavirus. If a bacterium is elected, applicant should elect Streptococci or Pneumococci (including *Klebsiella pneumoniae*) or Meningococci.

---

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features. The claims recite different inventions which are unobvious and distinct each over the other.
